*Holiday feeling  
home  
Sun or rather shade?*

## FEEL THE FREEDOM

The bags are packed, transport is booked. You are all set to leave for your favourite destination. Once you arrive, the weather is glorious; the world is at your feet. What will you do? A day at the beach? Play sports? Or discover some of the local culture? You are on a journey of discovery, the ultimate feeling of freedom. Hours feel like days and days like weeks, time seems to stand still.

If we told you that you do not have to travel thousands, hundreds or even a few miles for this feeling? Would you believe us? In fact, you can simply get this feeling at home, or rather; just outside your home. Your awning will create a sunny or shady spot at the push of a button. If even this sounds like too much trouble, you can opt for an advanced automation system equipped with all the conveniences and Smart features. Enjoy your own garden, as if you are on holiday. Feel free, every day, every moment you want to.

# TIME TO SHARE

'The bright side of life'. Bright times are to be shared with family, relatives or friends. Making time for each other seems increasingly difficult in today's zeitgeist. We have to combine our career, private life, sports and more. Everyone is busy. But let us not forget what life is really about; each other. Sharing quality time with those close to you is the best way to express how you feel about them.

Invite them over, light the barbecue again, organize a game night or ask them for just a drink. The possibilities are endless. We will make sure you have the place to host and entertain your guests, no matter what season, no matter what weather conditions. You decide when the time is right.

*A place  
to enjoy  
together*

*offline and  
relax*

## TIME FOR YOURSELF

In our busy lives, we tend to forget. Just take your foot off the accelerator, let go of the reins for a moment, without feeling guilty about it. It is very normal that you cannot always be switched on, neither physically nor mentally. Taking enough rest is very important. Relaxation and time for things you enjoy are crucial.

Retreat to your own oasis. Put away that phone, take a good book, the tablet with your favourite series or just take a nice nap in the great outdoors. Get away from the outside world in your own garden. Afterwards you will feel recharged and ready to face all obligations with fresh courage.

*Lovely sheltered and  
COZY feeling*

## THE CHARACTER OF **FABRIC**

Awning fabric is the mood setter in your garden. The colour and pattern you choose will largely determine the look of the overall appearance when the blinds are out. Do you prefer a colourful fabric, which will evoke a summery and cheerful feeling or do you prefer darker shades that lean more towards a designer and stylish look? Whatever choice you make with our awning, you are assured of the best quality fabric.

You will find that the shelter that an awning offers is not only aesthetic but also very practical. Summer or winter, you control the amount of light. The cozy feeling you get from sitting under the awning also provides more privacy. Even warmth will stay, allowing you to sit outside longer. An awning with our special fabric will give you control over these elements.

FOLDING ARM AWNING

Bring coziness to your own garden with the Oliva. The Oliva folding arm awning stands out thanks to its olive-shaped appearance, large size and the ability to place it in almost any situation imaginable. Both closed and open, Oliva is a pleasant sight on your facade. If you are looking for a stylish and high-quality folding arm awning, then the Oliva is the solution for you.

Features

- ☐ Fabric fully protected by cabinet
- ☐ Large shade area at maximum size
- ☐ Unique olive-shaped design
- ☐ Available with or without valance
- ☐ Available with manual or electric controls

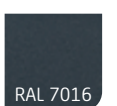

Installation

- ☐ Wall mounting
- ☐ Ceiling mounting

## FOLDING ARM AWNING

Those who choose the Alora prefer a modern design. With its smart design and angular lines, the Alora is suitable for combining with almost any architectural style. Both opened and closed, the Alora looks good. With the push of a button, you create a large area of shade to enjoy. You can also enjoy the folding arm awning at night because of the lighting that can be built into it. If you are looking for a modern and high-quality folding arm awning, then the Alora is the solution for you.

### Features

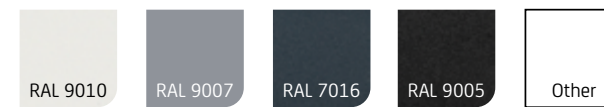

- ☐ Modern, smart and square design
- ☐ Option to integrate LED lighting (more atmosphere)
- ☐ Hardly visible when the awning is retracted

PERGOLA AWNING

Our Solidare pergola is the total solution that will undeniably enhance your outdoor living. The Solidare is very powerful. The zipper-guided fabric, completely fixed all around and the two slim uprights make it very sturdy and windproof. You can enjoy yourself without worry. If you are looking for a functional and powerful awning, the Solidare pergola is the solution for you.

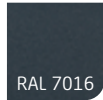

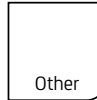

Features

- ☐ Protects against light and heat
- ☐ Ready-made solution
- ☐ Zipper guide system
- ☐ Fabric completely enclosed all around
- ☐ No light penetration between fabric and guide

FREESTANDING

If you value design and luxury, go for our Cubola Solidare. This cubist awning has no equal in appearance and functionality. It is completely free-standing, so you decide where to create a pleasant and shady spot. It is also possible to attach and link it to the wall for a larger area. The fabric has a special zipper technique. The fabric does not sag, not even at large sizes. The Cubola Solidare can be lowered vertically against the low sun. Looking for a luxurious and versatile awning, then the Cubola Solidare is the solution for you.

**Features**

- ☐ Square uprights
- ☐ Variable angle adjustment
- ☐ Freestanding and wall mounting
- ☐ Linking possible (also around the corner)

# YOUR OUTSIDE LIVING ROOM

Would you like a living room in your own garden? Furnish your patio as if it were an additional living space. All done lugging pillows, lugging (garden) furniture? Just leave it so you can enjoy it whenever you feel the need. Open the garden door(s) and increase your living space without having to apply for an expensive renovation or even a permit.

With a patio canopy, you can enjoy the outdoors much longer. Invite family and friends over for a party, or to watch a sports game together or for just a social drink. One thing is for sure, this way you will receive them in the place completely decorated to your taste.

*Garden doors open  
and enjoy*

PATIO CANOPY

Furnish the patio as if it were an extra room. This what our patio canopy can be. Ready to enjoy the outdoors with family and friends. Unlike our awning products, the Piazza patio canopy does not contain awning fabric, but glass panels or polycarbonate sheets. As a result, you will be protected from heavy rain and snow all year round. Enjoy your evenings and nights under the dimmable lighting that can be incorporated. Or organize a get-together in the autumn. With a Piazza patio canopy, this is certainly one of the possibilities. Screens for extra shelter are an option. Are you also looking for awnings? Then browse to the following pages.

Features

- ☐ Manufactured from high-quality aluminum profiles
- ☐ Option: glass or polycarbonate sheets
- ☐ Different shading systems applicable
- ☐ Vertical blinds SolidScreen applicable

Applicable shading systems

- ☐ Summerlight veranda awnings
- ☐ Solidare veranda awnings
- ☐ SolidScreen vertical blinds

Piazza (Linking possible)	7000 mm	4000 mm

VERANDA AWNINGS

This veranda awning has a zipper guide system, which makes it very strong and wind resistant. Because of the zipper guide, no streak of sunlight gets between the fabric and the guide. The Solidare veranda awning can be placed either beneath or on top of the canopy or veranda. Solidare Veranda is installed above a canopy. Solidare Verso is an awning that is placed on the underside of the roof. The advantages of this option is that the fabric is less likely to get dirty and last longer. These options will make your outdoor area an even more pleasant place to be. Enjoying the outdoors without restrictions.

VERANDA AWNINGS

Our Summerlight veranda awnings are 'what you see, is what you get'. This awning has already more than proven itself and will continue to do so through its sheer functionality. Summerlight has the cabinet above the fabric and the Summerlight Verso has the cabinet below the fabric. Do you have a covering or veranda that you want to expand with a cost-effective awning? Then the Summerlight offers the perfect opportunity. Nobody says that enjoying the outdoors has to be expensive.

Features

- ☐ Protects against light and heat
- ☐ Fabric completely enclosed all around
- ☐ No light penetration between fabric and guide
- ☐ Multiple mounting options
- ☐ High wind resistance

*Eye-catcher in your garden*  
*Prepared for everything*

## PLAY WITH **LIGHT & AIR**

Our louvered pergolas often create a 'wow effect'. They are stylish design. The minimalist square design suits both any garden and any architectural style. It will be the eye-catcher in your garden. The beauty of the clever design is that you really can create a shaded patio anywhere. Our louvered pergolas are completely free-standing. Shelter in the middle of the garden? No problem at all. Shelter by the pool? No problem at all. The possibilities are literally endless.

By rotating the slats, you play with light to create a splendid spectacle on the patio. A stylish accessory in the garden that also excels in practicality. A shower or even snowfall? Our louvered pergolas are prepared for everything so you can be out in poor weather. Enjoy this luxury awning all year round.

LOUVERED PERGOLA

The next chapter in shading we could call the Altera. A luxury freestanding or wall-mounted awning that turns your patio into a flexible outdoor space. Altera is made entirely of slim aluminum profiles and is extremely strong and durable. By rotating the slats you play with light and air on the terrace, in the evening you can turn on the LED lighting with just the push of a button. You decide where and when you want to enjoy the sun and shade. It is possible to link the Altera and hang screens for a little more privacy. If luxury is your desire, then go for the Altera louvered pergola.

Features

- ☐ Hybrid blinds
- ☐ Very robust and durable
- ☐ 125° Rotating slats
- ☐ Sun protection and water protection

Options:

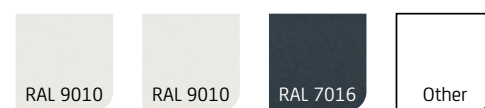

- ☐ SolidScreen
- ☐ LED lighting

Certifications

Max. per Altera (Linking possible)	4000 mm	3979 mm	2800 mm

\*\*\* Please note that this refers to the walk-through height. At a clearance height of 2800 mm, the total height of the Altera slatted roof (including open slats) is 3015 mm.

## LOUVERED PERGOLA

Even the most luxurious blinds can be improved. Divara is on that highest step. This slatted roof with optional lighting houses all the advantages of a luxury awning, but also adds all the advantages of a luxury patio canopy. So we like to call it a hybrid, the best of both worlds. Rain, wind of no less than 30m/s or even a snow shower of 70kg/m<sup>2</sup>, in principle you do not have to leave the Divara. Even when the weather is slightly less, you still enjoy the outdoors undisturbed. So, do you have a large patio that calls for a splendid addition then our Divara louvered pergola is the undisputed number one.

### Features

- ☐ Hybrid blinds
- ☐ Very robust and durable
- ☐ Large size rotating slats
- ☐ Sun protection and water protection
- ☐ Very high maximum wind and snow loads

### Options:

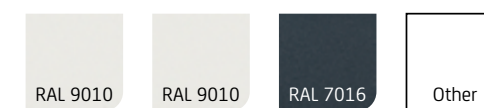

- ☐ SolidScreen
- ☐ LED lighting

### Certifications

\*\*\* Please note that this refers to the clearance height. At a clearance height of 2745 mm the total height of the Divara slatted roof is 3003 mm (clearance height + 258 mm).

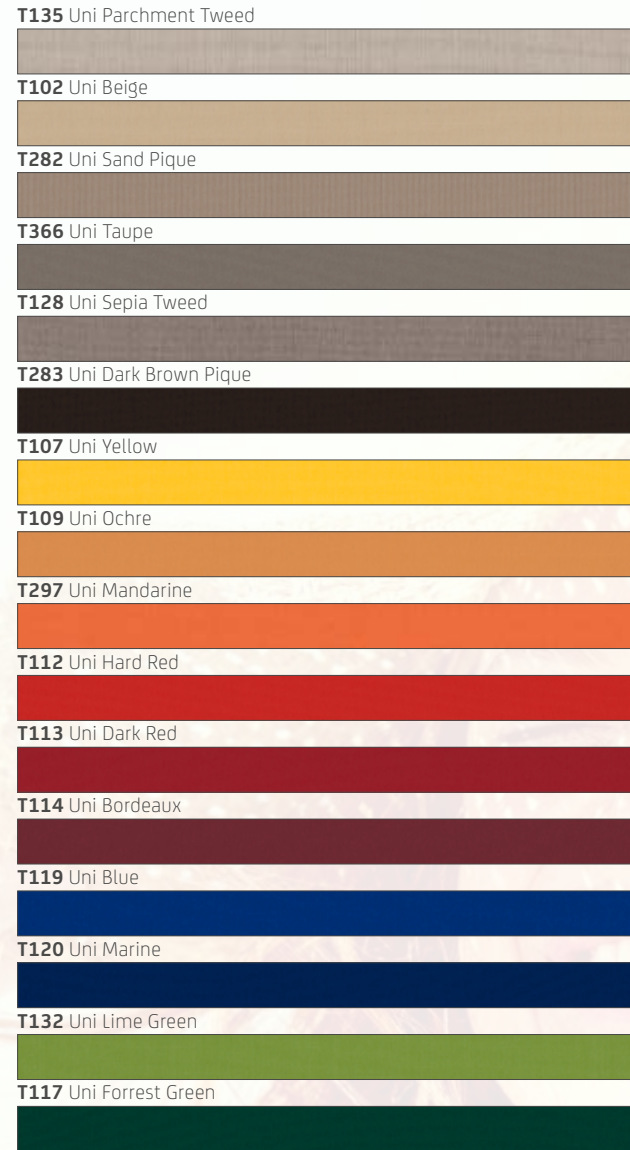

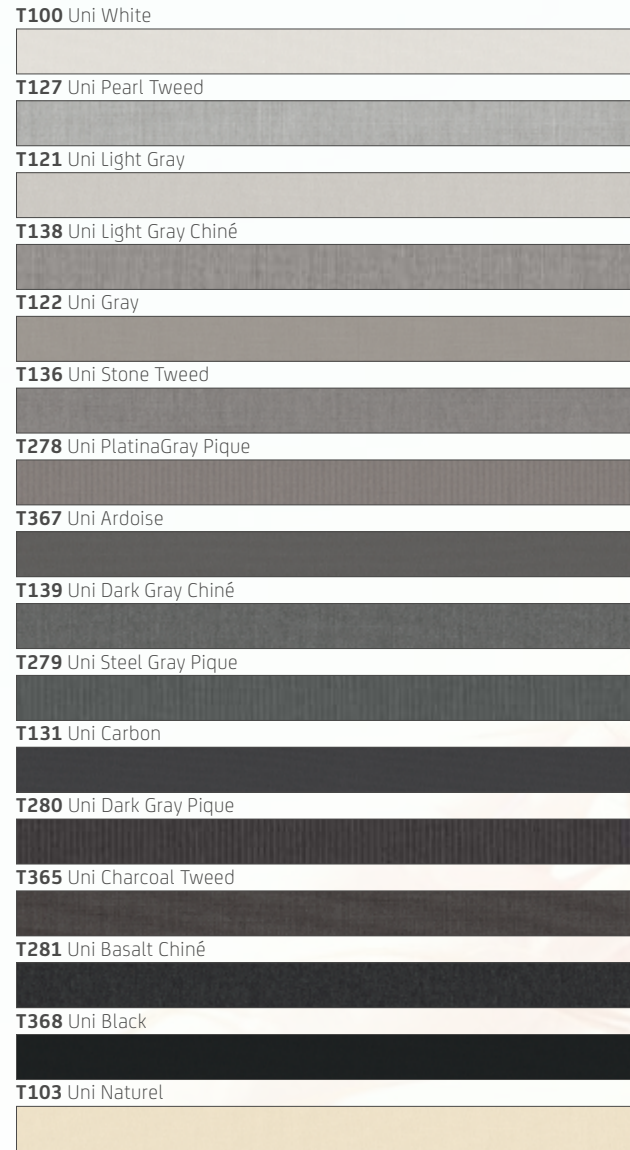

## TO MEET ALL your **WISHES**

Nothing is more typical of the current zeitgeist than customized products. Clothing, electronics, means of transportation, fashion accessories and so on, everything is customized. We do not claim that we started this trend, but it is a fact that our awnings have been completely customized for years. All the choices you make will ultimately determine the look and character of your blinds. Obvious choices are, of course, the type, colour of the casing as well as the fabric. But did you know there is much more to it when it comes to sun shade systems?

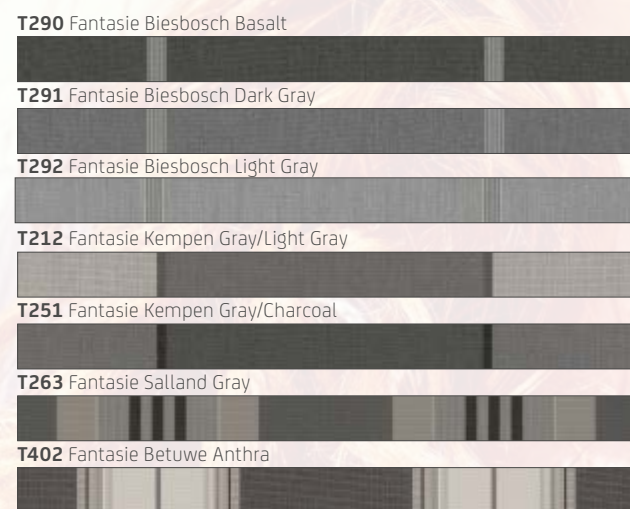

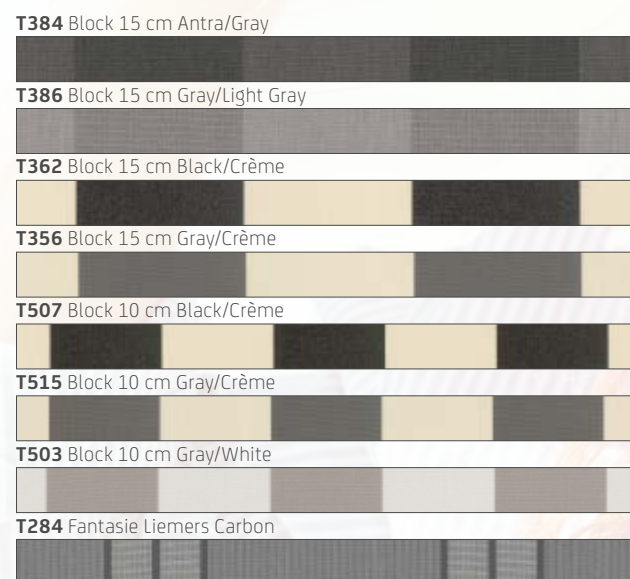

In fact, depending on the type of sun shade you choose, there are many more choices to make. They include different accessories and control options. Do you prefer a wall switch that can always be found in the familiar place so you don't have to look for the remote control? Or rather via a handy app on your smartphone (that is always in your pocket anyway). It's entirely up to you. In some cases, it is even possible to expand your awning with another awning. The combinations are too many to list them all in detail here. One thing is certain, you can put together the blinds in a manner that will perfectly fit all your needs and wishes.

VERTICAL SCREENS

Screens are a form of outdoor sun protection that have gained great popularity in recent years. The SolidScreen has a zipper guide system. Several variations are available for application to your home. SolidScreen can be used for different sun shading systems.

A SolidScreen applied in our shading systems protects against the low-level sun. One feature that is often overlooked, however, is that the SolidScreen fully closed is also a high-quality windbreak. This way you can enjoy peace and quiet in your own garden.

More information? Ask for the SolidScreen information.

## ULTIMATE EASE OF OPERATION

Ease of operation, that's probably music to your ears. Where manual control was once the rule, in line with technological development, electric control is now the new standard. A familiar wall switch, single or multi-channel remote control, an app on your smartphone or even semi- or fully automatic control by installing a wind sensor. The options are plenty. Your preference and which shading product you chose will determine the best option. Therefore, every situation and preference requires a different solution. We are here to help you, so please share your preferences and we will be happy to explain the possibilities.

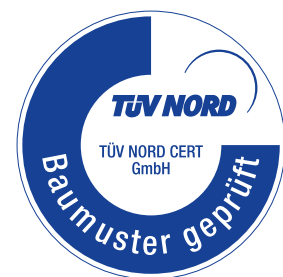

## QUALITY

We attach great importance to the quality of our products. Since 2000, we have therefore been testing our awnings in cooperation with TÜV-Nord. Outdoor awnings that meet CE standards are tested according to various DIN standards. These standards contain a number of test points which lead to the following 3 classifications:

- Lifespan class
- Water load class
- Wind pressure class

### Lifespan class according to DIN EN 13561

Lifespan indicates the number of open and close movements an outdoor awning can withstand. The following overview shows which lifespan classes are available.

Number of movements	Class 1	Class 2	Class 3
Open and close	3,000	7,000	10,000

### Water load class according to DIN EN 1933

Water load is the amount of water in liters/m<sup>2</sup> per hour that an outdoor awning can withstand. That is the amount of precipitation that a fully opened awning with an inclination setting of 14° (corresponds to a slope amount of 25%) must be able to drain. The overview below shows which water load classes there are.

Water load class	Class 1	Class 2
Amount of precipitation	17 litres/m <sup>2</sup> per hour	56 litres/m <sup>2</sup> per hour

### Wind pressure class according to DIN EN 1932

Wind pressure is the maximum amount of wind that an opened exterior awning product can withstand. The overview below shows which wind pressure classes are available.

Wind pressure class	Class 0	Class 1	Class 2	Class 3	Class 4
Beaufort scale	< 4	4	5	6	7
V (km/h) (maximum)	< 28 km/h	28 km/h	38 km/h	49 km/h	61 km/h
V (m/s) (maximum)	< 7.8 m/s	7.8 m/s	10.5 m/s	13.6 m/s	17 m/s
Nominal test pressure (N/m <sup>2</sup> )	< 40	40	70	110	170
Safety test pressure 1.2 p (N/m <sup>2</sup> )	< 48	48	84	132	204

#### Example:

Wind pressure class 1 = Beaufort scale class 4 = wind speed of max. 28 km/h or 7.8 m/s = pressure of 40 Newtons per m<sup>2</sup>.

### Static calculations of patio canopys and louvered pergolas
